Ask for more information.

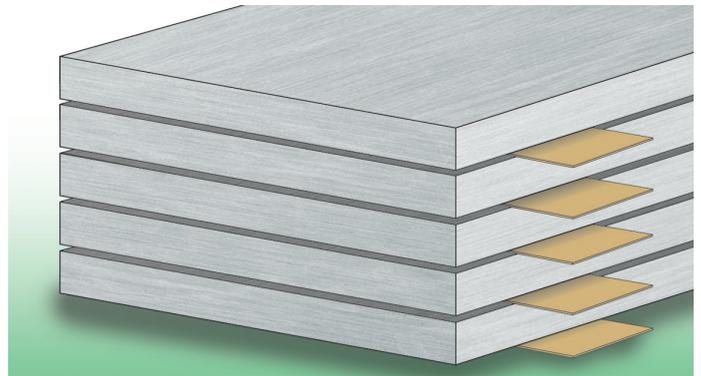

SIZES

Quality	Sides	Width mm	Thickness mm	Length mm
HS	Open	30, 40, 50, 60, 70, 100, 120	1-8	50 - 3000
BIO	Closed	90, 120, 135, 150, 155, 180, 300	2-8	500 - 6000

Due to its strength, size and quality, flatboard is a product of endless possibilities. It is known to be used as

- protection for steel rolls (strapping and corrosion)
- between delicate surfaces
- dividing to smaller packages
- side and floor protection in containers and trains
- separating aluminium profiles while processing
- attaching plastic covers (see Eltete cover fix)
- strengthening packages

Using flatboards in between very delicate laminate products prevents all scratches.

Protected design RCD 000449582-0001

Uneven walls and floors in containers and trains may cause transport damage to the loaded goods. This can be avoided by using Flatboards as side and floor protection.

Eltete TPM Ltd (Transport Packaging Materials) is a global carton board converter and an ISO-certified supplier of 100% recyclable transport packaging materials. With our own engineering division we are able to react quickly to customer demands.

With experience since 1974, we are experts in the needs of today's market. Innovative and high-quality packaging solutions made of compact carton board are being offered in more than 60 countries through Eltete sales organization. With 19 production sites in 15 countries we are close to our customers.

Eltete TPM is the world's leading producer of sustainable carton board transport packaging materials and solutions.
